FAQ

1. Why is my device offline?
Check if:
- The device is connected correctly to the power supply
- Configuration was done correctly.

2. SD memory card can not be read?
Please check your SD card to see if it meets the requirements quality, when the Wi-Fi signal is not stable, you can not also identify it.

3. Is the camera disconnecting?
Check the power supply and the Internet network, and then-do not restart the camera. If that doesn't work,
please remove the device and add it again in the application.

4. Video interrupts or video running slow.
If the video is still loading/buffering, check the connection internet..

5. How can other people watch the video?
Share your account in the app with others.

6. How many people can use the account at the same time?
There are no restrictions.

PRECAUTIONS

USE THE RIGHT POWER SOURCE
The input voltage of the cameras is 12V DC/1A OR 12V DC/2A. Remember to use only the original power supply supplied with the product or another with the above parameters. Connect the camera to an appropriate power source. Incorrect connection of the camera threatens its failure or damage.

HANDLE CAMERA WITH CARE
Use the camera according to the instructions. Avoid hitting the camera, shaking it, etc. Improper handling or storage of the camera may result in damage to the camera.

STORAGE MEDIA USAGE – SD CARD
Use only memory cards recommended for working with cameras or others with a speed class of at least 10. Using other cards may lead to incorrect storage of material on the memory card.

PROTECTION AGAINST FACTORS ATMOSPHERIC
Camera connection cables should be protected against the influence of weather conditions, i. e. rain, snow or moisture by using recommended spacers. Improper protection can result in permanent damage to the equipment and loss of service warranty.

CAMERA WORKING ENVIRONMENT
The cameras are designed for use in environments with temperatures between -20°C-+60°C and humidity 10%-90%

DO NOT USE STRONG OR ABRASIVE AGENTS CLEANERS FOR CLEANING THE CAMERA BODY
If the camera is dirty, clean it with a damp cloth. If dirt is resistant, use a mild detergent and gently wipe the camera.

DO NOT POINT THE CAMERA TOWARDS THE SUN
Do not point the camera at the sun or other sources of very bright light. This threatens the appearance of stains, even if the camera is switched off, and consequently damage the camera matrix.

DO NOT PLACE THE CAMERA IN PLACES OCCURRENCE OF DISTURBANCES
If the camera is installed near devices emitting electromagnetic fields, this may lead to malfunctioning of the camera.
