Zintron I4 SOLAR

The Zintron I4 Solar camera offers high quality 4-megapixel, video, providing images in 4K quality. Thanks to modern technology, you can record and save images in excellent quality. In addition, the camera is equipped with next-generation IR LEDs, which provide clear viewing even at night. They are highly efficient, allowing you to see an area up to 30 metres away from the device.

High weather resistance is guaranteed by the IP66-rated housing, which allows installation both indoors and outdoors, regardless of the weather. An unquestionable advantage of this camera is the ability to work in places where there is no WiFi coverage. The camera has a sim card slot and 2 antennas to enhance GSM signal reception. This enables remote access to the camera via GSM 3/4G LTE networks.

SPECIFICATION:

Camera type:	PTZ IP GSM
Processor:	GK7202
Sensor:	5C233A
Resolution:	4 MPx - 2560x1440
Frame rate:	12
Objective:	3.6mm (viewing angle 100°)
Lens Night illumination:	Infrared/White, distance up to 30 metres
Wired connection:	10/100 Base-T
Wireless connection:	No
GSM module:	3G / 4G LTE
Access point function:	Yes
Memory card:	Yes (up to 128GB)
Horizontal/Vertical panning:	Panning angle 270°/90°
DVR co-operation:	Protocol ONVIF
Speaker:	Yes
Microphone:	Yes
Alarm events:	Motion detection, character detection
Alarm association:	Save to memory card, FTP server, Siren
Alarm notifications:	From app, to email
Reset button:	Flap cover
Dedicated app:	iCSee, VMS
Housing:	Plastic, IP66
Power supply:	DC5V/1A
Dimensions:	190mm x 145mm x 105mm
Weight:	650g
Additional features:	Character tracking
