Switch URUS

The URUS switch is a 10-port 10 / 100Mbps unmanaged switch that requires no configuration and provides 8 PoE ports. All 8 ports support automatic MDI / MDIX, allowing the use of any type of cable.

The high PoE budget makes the device ideal for small and medium-sized corporate surveillance systems. PoE+ technology, based on the IEEE 802.3at protocol, allows users to power peripheral devices with up to 30W, allowing full HD camera video to be transmitted in real time at full smoothness.

PoE transmission over Cat5e / Cat6 cable allows peripherals to be supplied with power at high data rates (up to 100 Mbps).

SPECIFICATION:

Switch type:	Unmanageable
SFP port:	None
10/100Base-TX PoE port:	8
10/100Base-TX port:	None
10/100/1000Base-TX port:	2
Port isolation mode:	Yes
Extended range mode:	Yes
Flow control mode:	Yes
Automatic crossover:	Yes
Power socket:	5.5/2.1
Power supply from socket:	DC12V/2.5A
Humidity:	5%~90% (non-condensing)
Operating temperature:	-10°C~55°C
Enclosure:	Metal
Dimensions:	210x85x28mm
Weight:	400g
